

Active USB3 Vision Cable

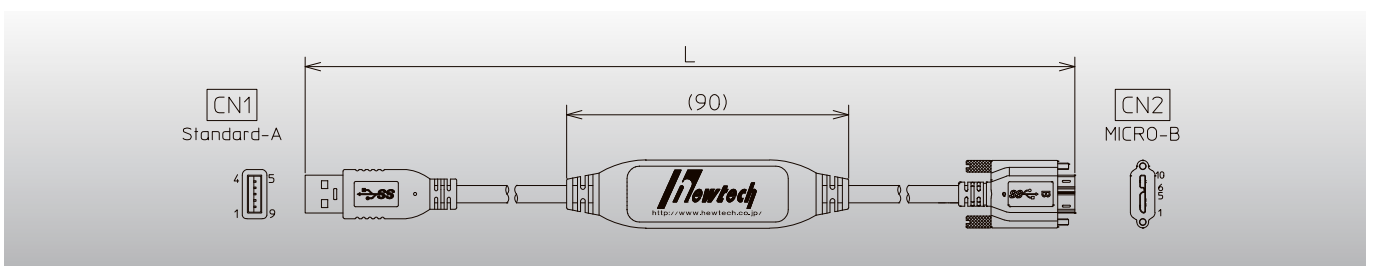

A series of Active Copper Cable (ACC) products have been released as USB3 Vision cables for mid- and long-distance transmission. It is possible to combine the standard Type-A connector with the Type-B, Micro-B or Type-C connector (with or without a screw). As fixing and sliding cables can be selected, the product can be used in various applications. Complies with the RoHS Directive (10 substances).

Example of a finished product : Standard-A to Micro-B(with Screw)

* Examples of supported plugs

Reference of ACC transmission distance

Transmission distance of approx. 12 m can be supported while it differs depending on the performance of and compatibility with the USB3 Vision camera, PC, hub, and frame grabber (FG) board to be connected.

- *1) Before adopting this product, perform an evaluation test in your operating environment. (For information about the rental evaluation cable, contact our sales staff.)
- *2) We are developing an AOC cable for customers who want cables whose length is 12 m or more. A rental transmission evaluation sample is available. Contact us.
- *3) The maximum length is 50m when the AOC type is used alone. (AM to AF)
